To: Attendees

STUDY OF PROVISIONS FOR AN INTERNATIONAL CONVENTION
CONCERNED WITH PHYSICAL SECURITY GUIDELINES AND TRANSFER
OF MATERIAL, EQUIPMENT AND TECHNOLOGY

A meeting was held on June 27, 1974, among those listed in the attached "attendees sheet" to discuss the scope of the planned study. A tentative study outline was distributed and assignments were agreed to by each individual. The outline was revised during the meeting and the finalized version is attached, also showing those offices or agencies having primary responsibility for the various portions. Where multiple participation is indicated, the first listed office or agency will assume the lead and will be responsible for coordinating the inputs of the others. A first draft will be given to the chairman (Vance H. Hudgins) by c.o.b. July 12, 1974.

It was agreed that the subject matter, unless materials used from other sources are clearly designated, will be treated as CONF/GDS.

It was further agreed that maximum interagency coordination and liaison will be affected by the participants in order that cross-fertilization of ideas will be included in the final report.
